

BELGIUM TO RESUME INDUSTRY--WILSON

President Expresses Confidence That People Will Once More Assume Former Place.

BRUSSELS, June 19.—At the dinner given tonight in honor of President and Mrs. Wilson by the king and queen of Belgium with Cardinal Mercier and other distinguished guests present, the president addressing King Albert spoke as follows:

"Let me express, sir, the very deep appreciation with which I have heard your remarks. You truly say that I have come to Belgium to express my own deep personal interest and sympathy—sympathy with her sufferings and interests in particular, but also with all personal consequences if it were not my privilege for the time being to represent the people of the United States.

"What gives me confidence in expressing this sympathy and this interest is that I know in expressing the feelings of the people of the United States there has never been in the United States more general and universal comprehension of sympathy with the affairs of another nation than that which the people of the United States have had for the affairs and the people of Belgium.

Speaks for People. "I have had the very great advantage of seeing the little that I have had time to see of the experience of Belgium under your guidance and I know well enough that it is difficult to find many points of sympathy between the people whom I have the pleasure of representing and the people whom you represent. They are a very democratic people and it has been very delightful to find, sir, that you are a true democrat. All real masters of the sentiments of the people are parts of the people and of the things that give confidence in the future of Belgium is the consciousness that one has of the self-reliance and indomitable spirit of her people. They need to have a friendly hand extended to them, but they do not need to have anybody take care of them.

"A people that is taken care of by its government is a people that its government will always have to take care of, but the people of Belgium, if I have caught any glimpse of their spirit and their character, do not need to have anybody take care of them. They need, because of the catastrophe of this war, temporary assistance to get the means to take care of themselves, but the moment they have the means then the rest of us will have to take care to see that they do not do the work they are asked to do better than we do. The people of Belgium will offer this assistance, they will become our generous and dangerous rivals and for my part I believe I can say truthfully that the people of the United States want the people of Belgium to recover their power, to be rivals to be rivals in those fields in which they have for so long a time proved themselves masters.

"It is therefore, sir, a peculiar feeling of being among a people that I understand that I have found myself under your guidance, sir, touching shoulders with the people of Belgium today. When I went to the great destroyed plant of Charleroi, the high most of the chimneys were smokeless, the whole region

seemed like so many regions I am familiar with in my own country, and the air was full of smoke, but smoke I could hear far entirely at home. The air was too clear and natural in such a region, and yet I had the feeling that smoke was going to come in its old abundance from those chimneys and the world of industry was once more going to feel the pulse of Belgium that vital pulse which no discouragement can restrain.
